Theory of Economic Crises I – Vol. 1. St. Petersburg: Pechatny Tsekh Publishing. – 2020. – 416 p.

The book offers a new theoretical approach to economic crises using the theory of shells. Applied to economics, the theory allows describing processes in crisis conditions in economy and revealing theoretically possible scenarios and options for resolving crisis conditions either without any loss or even gaining from crisis in terms of increased GDP.

The book can be used by bankers, theorists of economics, post-graduates and students of economics, and all those interested in the topic.

PIL Eduard Anatolyevich

CONTENTS

INTRODUCTION	6
CHAPTER I	
ANALYSING ECONOMIC CRISES AND THEIR DEVELOPMENT	7
1. Classification of economic crises.....	8
1.1 Classification of economic crises – 1	8
By degree of imbalances arising in economic systems	8
By regularity of imbalances arising in the economy	8
By character of disproportion in production	8
1.2 Classification of economic crises – 2	8
By causes of crisis.....	8
By length.....	9
By stage	9
By localization of factors.....	9
By nature of crisis.....	9
By scale.....	9
By depth.....	9
By recurrence.....	10
1.3 Classification of economic crises – 3	10
By scale.....	10
By scope	10
By structure of relations in socio-economic system	10
By direct causes	10
By character of occurrence	10
By time factor	10
1.4 Classification (typology) of crises – 4	11
Crises	11
Functions of crisis.....	11
Dynamics of crisis	11
Organizational crises	12
Crisis factors in organization.....	13
Grouping factors of organizational external and internal environment.....	13
Types, phases and cycles of crises in organizations	13
Organization's liabilities and insolvency as major causes of crises	14
Crises of public administration.....	14
Features of economic crisis at macroeconomic level	14
1.5 Classification of crises – 5.....	15
1.6 Typology of crises	16
1.7 Analysing theories of economic crises	18
1.7.1 Development of theory of crises	18
Evolution of the classical theory of crises	21
Economic crises in terms of the theory of financial intermediaries.....	24
Crises and survival of economy.....	25
1.7.2 Single theory of cycles, crises, formations.....	28
1.7.3 Comparative analysis of theories of modern financial and economic crisis by Khazin and Taleb....	28
CONCLUSIONS	33
CHAPTER II	
THEORETICALLY POSSIBLE SCENARIOS OF CHANGES IN ECONOMY	
AND POPULATION	34
2.1 Construction of table to predict scenarios of changes in economy and population	34
2.2 Scenarios of variables e_t и p_t development.....	39
2.3 Classification of variables e_t и p_t progression.....	61
2.4 Classification of countries by areas of economy and population	63
CONCLUSIONS	65

CHAPTER III

SCENARIOS OF MACROECONOMIC DEVELOPMENT WITH EXTERNAL AND INTERNAL PRESSURES APPLIED VARIANTS OF MACROECONOMICS

3.1	Scenarios of macroeconomic development under external and internal pressures.....	66
1 st	type of deformation with three shells staying unchanged.....	68
2 nd	type of deformation with three shells expanding.....	69
3 rd	type of deformation with three shells contracting.....	73
4 th	type of deformation with shells of big and medium-size businesses expanding and shell of small business contracting.....	75
5 th	type of deformation with shell of big business expanding and shells of medium-size and small businesses contracting.....	76
6 th	type of deformation with shells of big and small businesses contracting and shell of medium-size business expanding.....	76
7 th	type of deformation with shells of big and medium-size businesses expanding and shell of small business unchanged.....	77
8 th	type of deformation with shells of big and medium-size businesses contracting and shell of small business unchanged.....	77
3.2	Spherical economic shells.....	79
3.3	Ellipsoidal economic shells	81
3.4	Variant calculations for spherical economic shell.....	82
3.5	Variant calculations for area of spherical economic shell.....	85
CONCLUSIONS		91

CHAPTER IV

CALCULATIONS OF SPHERICAL ECONOMIC SHELL VOLUME PARAMETERS

4.1	Upper critical volume of spherical economic shell V_{su}	92
4.1.1	Calculation of upper critical volume of spherical economic shell V_{su}	92
4.1.2	Summary tables for upper critical volume V_{su} of spherical economic	142
4.1.3	Calculation of upper critical volume V_{su} given decreasing values of all variables	148
4.1.4	Calculation of upper critical volume V_{su} given increased number of decimals in variables X_{4su}	150
4.1.5	Calculation of theoretically attainable upper critical unit volume V_{stu1} of spherical economic shell.....	151
4.2	Lower critical volume V_{sl} of spherical economic shell.....	154
4.2.1	Calculation of lower critical volume V_{sl} of spherical economic shell.....	154
4.2.2	Summary tables of lower critical volume V_{sl} of spherical economic.	167
4.2.3	Calculation of lower critical volume V_{sl} given decreasing values of all variables	171
4.2.4	Calculation of theoretically attainable lower critical unit volume V_{stl1} of spherical economic shell.....	172
4.3	Domain of spherical economic shell volume ΔV_{sul}	175
4.3.1	Calculation of spherical economic shell volume ΔV_{sul} domain	175
4.3.2	Summary tables of ΔV_{sul} spherical economic shell domain.....	188
4.4	Upper critical area of SV_{su} spherical economic shell volume.....	192
4.4.1	Calculation of upper critical area of SV_{su} spherical economic shell volume.....	192
4.4.2	Summary tables of upper critical area of SV_{su} spherical economic shell.	219
4.5	Lower critical area of SV_{sl} spherical economic shell.....	225
4.5.1	Calculation of lower critical area of SV_{sl} spherical economic shell volume	225
4.5.2	Summary tables of lower critical area SV_{sl} of spherical economic shell.....	234
4.6	Area value $S\Delta V_{sul}$ of spherical economic shell	237
4.6.1	Calculation of area value $S\Delta V_{sul}$ of spherical economic shell	237
4.6.2	Summary tables of critical area values $S\Delta V_{sul}$ of spherical economic shell volume	246

CHAPTER V

CALCULATION OF SPHERICAL ECONOMIC SHELL SURFACE AREA PARAMETERS

5.1.	Upper critical surface area S_{su} of spherical economic shell	249
5.1.1	Calculation of upper critical surface area S_{su} of spherical economic shell	249
5.1.2	Summary tables for upper critical surface area S_{su} of spherical economic shell	277
5.1.3	Calculation of upper critical surface area S_{su} given decreasing values of all variables.....	284

5.1.4	Calculation of upper critical surface area S_{su} given increased number of decimals in variables $X4_{su}$	285
5.1.5	Calculation of theoretically attainable upper critical unit surface area S_{stu1} of spherical economic shell	286
5.2	Lower critical surface area S_{sl} of spherical economic shell	289
5.2.1	Calculation of lower critical surface area S_{sl} of spherical economic shell.....	289
5.2.2	Summary tables for lower critical surface area S_{sl} of spherical economic shell	299
5.2.3	Calculation of lower critical surface area S_{sl} given decreasing values of all variables	302
5.2.4	Calculation of theoretically attainable lower critical unit surface area S_{sl1} of spherical economic shell.....	304
5.3	Spherical economic shell surface area ΔS_{sul} domain	307
5.3.1	Calculation of spherical economic shell surface area ΔS_{sul} domain.....	307
5.3.2	Summary tables of upper critical surface area SS_{su} of spherical economic shell.....	316
5.4	Upper critical area of SV_{su} spherical economic shell volume domain.....	320
5.4.1	Calculation of upper critical area of SV_{su} spherical economic shell volume.....	320
5.4.2	Summary tables of upper critical surface area of SS_{su} spherical economic shell volume domain	347
5.5	Summary tables of upper critical surface area of SS_{su} spherical economic shell volume domain.....	353
5.5.1	Calculation of lower critical surface area of SS_{sl} of spherical economic shell domain.....	353
5.5.2	Summary tables of lower critical surface area SS_{su} domain of spherical economic shell	362
5.6	Surface area $S\Delta S_{sul}$ domain of spherical economic shell	365
5.6.1	Calculation of surface area $S\Delta S_{sul}$ domain of spherical economic shell	365
5.6.2	Summary tables of surface area $S\Delta S_{sul}$ domain of spherical economic shell	374
5.7	Comparison of volume V_{su} and surface area S_{su} values.....	377
5.7.1	Calculation of volume V_{su} and surface area S_{su} values comparison	377
5.7.2	Summary tables of volume V_{su} and surface area S_{su} values of spherical economic shell.....	395
5.8	Comparison of volume V_{sl} and surface area S_{sl} values	398
5.8.1	Calculation of volume V_{sl} and surface area S_{sl} values comparison	398
5.8.2	Summary tables of volume V_{sl} and surface area S_{sl} of spherical economic shell	402

INTRODUCTION

The issue of economic and financial crises has been attended in a wide range of studies offering various solutions, none, however, allowing for a complex approach. Thus, the present study offers to apply the theory of shells to determine and describe the processes in crisis economy. The theory, so applied, allows for predicting theoretically possible scenarios, performing calculations and, based on these, developing ways to resolve crisis conditions in an economy. Governments may use the instruments offered and select a most suitable and effective solution either maintaining the current level or even increasing the country's GDP.

The book is dedicated to my son *Mikhail* and grandson *Stepan*, and to my late beloved parents and elder brother.
