INTRODUCTION 7

CHAPTER I
ANALYSING ECONOMIC CRISES AND THEIR DEVELOPMENT 8
1. Classification of economic crises 9
1.1 Classification of economic crises – 1 9
By degree of imbalances arising in economic systems 9
By regularity of imbalances arising in the economy 9
By character of disproportion in production 10
1.2 Classification of economic crises – 2 10
By causes of crisis 10
By length 10
By stage 10
By localization of factors 10
By nature of crisis 10
By scale 11
By depth 11
By recurrence 11
1.3 Classification of economic crises – 3 11
By scale 11
By scope 11
By structure of relations in socio-economic system 11
By direct causes 12
By character of occurrence 12
By time factor 12
1.4 Classification (typology) of crises – 4 12
Crises 12
Functions of crisis 13
Dynamics of crisis 13
Organizational crises 14
Crisis factors in organization 15
Grouping factors of organizational external and internal environment 15
Types, phases and cycles of crises in organizations 15
Organization's liabilities and insolvency as major causes of crises 16
Crises of public administration 17
Features of economic crisis at macroeconomic level 17
1.5 Classification of crises – 5 17
1.6 Typology of crises 18
1.7 Analysing theories of economic crises 21
1.7.1 Development of theory of crises 21
Evolution of the classical theory of crises 24
Economic crises in terms of the theory of financial intermediaries 28
Crises and survival of economy 28
1.7.2 Single theory of cycles, crises, formations 32
1.7.3 Comparative analysis of theories of modern financial and economic crisis by Khazin and Taleb 32
CONCLUSIONS 37

CHAPTER II
THEORETICALLY POSSIBLE SCENARIOS OF CHANGES IN ECONOMY AND POPULATION 38
2.1 Construction of table to predict scenarios of changes in economy and population 38
2.2 Scenarios of variables e_t и p_t development 43
2.3 Classification of variables e_t и p_t progression 67
2.4 Classification of countries by areas of economy and population 67
CONCLUSIONS 71

CHAPTER III
SCENARIOS OF MACROECONOMIC DEVELOPMENT WITH EXTERNAL AND INTERNAL PRESSURES APPLIED VARIANTS OF MACROECONOMICS 72
3.1 Scenarios of macroeconomic development under external and internal pressures 72
1st type of deformation with three shells staying unchanged 74
2nd type of deformation with three shells expanding 75
3rd type of deformation with three shells contracting 81
4th type of deformation with shells of big and medium-size businesses expanding and shell of small business contracting 82
5th type of deformation with shell of big business expanding and shells of medium-size and small businesses contracting 82
6th type of deformation with shells of big and small businesses contracting and shell of medium-size business expanding 83
7th type of deformation with shells of big and medium-size businesses expanding and shell of small business unchanged 83
8th type of deformation with shells of big and medium-size businesses contracting and shell of small business unchanged 84
3.2 Spherical economic shells 86
3.3 Ellipsoidal economic shells 89
3.4 Variant calculations for spherical economic shell 89
3.5 Variant calculations for area of spherical economic shell 93
CONCLUSIONS 99

CHAPTER IV
CALCULATIONS OF SPHERICAL ECONOMIC SHELL VOLUME PARAMETERS 100
4.1 Upper critical volume of spherical economic shell V_{su} 100
4.1.1 Calculation of upper critical volume of spherical economic shell V_{su} 100
4.1.2 Summary tables for upper critical volume V_{su} of spherical economic 150
4.1.3 Calculation of upper critical volume V_{su} given decreasing values of all variables 156
4.1.4 Calculation of upper critical volume V_{su} given increased number of decimals in variables $X4_{su}$ 158
4.1.5 Calculation of theoretically attainable upper critical unit volume V_{stu1} of spherical economic shell 159
4.2 Lower critical volume V_{sl} of spherical economic shell 162
4.2.1 Calculation of lower critical volume V_{sl} of spherical economic shell 162
4.2.2 Summary tables of lower critical volume V_{sl} of spherical economic 175
4.2.3 Calculation of lower critical volume V_{sl} given decreasing values of all variables 179
4.2.4 Calculation of theoretically attainable lower critical unit volume V_{stl1} of spherical economic shell 180
4.3 Domain of spherical economic shell volume ΔV_{sul} 183
4.3.1 Calculation of spherical economic shell volume ΔV_{sul} domain 183
4.3.2 Summary tables of ΔV_{sul} spherical economic shell domain 196
4.4 Upper critical area of SV_{su} spherical economic shell volume 200
4.4.1 Calculation of upper critical area of SV_{su} spherical economic shell volume 200
4.4.2 Summary tables of upper critical area of SV_{su} spherical economic shell 227
4.5 Lower critical area of SV_{sl} spherical economic shell 233
4.5.1 Calculation of lower critical area of SV_{sl} spherical economic shell volume 233
4.5.2 Summary tables of lower critical area SV_{sl} of spherical economic shell 242
4.6 Area value $S\Delta V_{sul}$ of spherical economic shell 245
4.6.1 Calculation of area value $S\Delta V_{sul}$ of spherical economic shell 245
4.6.2 Summary tables of critical area values $S\Delta V_{sul}$ of spherical economic shell volume 254

CHAPTER V
CALCULATION OF SPHERICAL ECONOMIC SHELL SURFACE AREA PARAMETERS 257
5.1. Upper critical surface area S_{su} of spherical economic shell 257
5.1.1 Calculation of upper critical surface area S_{su} of spherical economic shell 257
5.1.2 Summary tables for upper critical surface area S_{su} of spherical economic shell 285
5.1.3 Calculation of upper critical surface area S_{su} given decreasing values of all variables 292

5.1.4 Calculation of upper critical surface area S_{su} given increased number of decimals in variables $X4_{su}$ 293
5.1.5 Calculation of theoretically attainable upper critical unit surface area S_{stu1} of spherical economic shell 294
5.2 Lower critical surface area S_{sl} of spherical economic shell 297
5.2.1 Calculation of lower critical surface area S_{sl} of spherical economic shell 297
5.2.2 Summary tables for lower critical surface area S_{sl} of spherical economic shell 307
5.2.3 Calculation of lower critical surface area S_{sl} given decreasing values of all variables 310
5.2.4 Calculation of theoretically attainable lower critical unit surface area S_{stl1} of spherical economic shell 311
5.3 Spherical economic shell surface area ΔS_{sul} domain 315
5.3.1 Calculation of spherical economic shell surface area ΔS_{sul} domain 315
5.3.2 Summary tables of upper critical surface area SS_{su} of spherical economic shell 324
5.4 Upper critical area of SV_{su} spherical economic shell volume domain 328
5.4.1 Calculation of upper critical area of SV_{su} spherical economic shell volume 328
5.4.2 Summary tables of upper critical surface area of SS_{su} spherical economic shell volume domain 355
5.5 Summary tables of upper critical surface area of SS_{su} spherical economic shell volume domain 361
5.5.1 Calculation of lower critical surface area of SS_{sl} of spherical economic shell domain 361
5.5.2 Summary tables of lower critical surface area SS_{su} domain of spherical economic shell 370
5.6 Surface area $S\Delta S_{sul}$ domain of spherical economic shell 373
5.6.1 Calculation of surface area $S\Delta S_{sul}$ domain of spherical economic shell 373
5.6.2 Summary tables of surface area $S\Delta S_{sul}$ domain of spherical economic shell 382
5.7 Comparison of volume V_{su} and surface area S_{su} values 385
5.7.1 Calculation of volume V_{su} and surface area S_{su} values comparison 385
5.7.2 Summary tables of volume V_{su} and surface area S_{su} values of spherical economic shell 403
5.8 Comparison of volume V_{sl} and surface area S_{sl} values 406
5.8.1 Calculation of volume V_{sl} and surface area S_{sl} values comparison 406
5.8.2 Summary tables of volume V_{sl} and surface area S_{sl} of spherical economic shell 410

'For me a word of wisdom is more valuable than any gold.'
Democritus

INTRODUCTION

Various authors dedicated a huge amount of their works to the issue of economic and financial crisis and offered their ways out of the crisis. Although, unfortunately, none of works succeeded in the profound solving of the problem. Due to this fact the author of this work suggests to use the theory of the economic shell in order to describe processes in economy suffering from crisis. This theory gave an opportunity to design theoretic scenarios of economic crisis development and to perform calculations which help to indicate the probable methods to be used in recovering from any type of economic recession. These methods enable government to choose an appropriate way out of the particular crisis without loss and even with the increase of gross domestic product of a country.

The book is dedicated to my son *Mikhail* and grandson *Stepan*, and to my late beloved parents and elder brother.

Wishing you all the best.

Yours sincerely, Author
