INTRODUCTION.....5

CHAPTER 1
CALCULATING VARIABLE VALUES X1*el* FOR THE LOWER CRITICAL VOLUME *Vel* OF THE ELLIPSOID ECONOMIC SHELL..... 6

1.1. Calculating variable values $X1_{el}$ for the lower critical volume V_{el} of the ellipsoid economic shell 6
1.2. Summary tables of the variable values $X1_{el}$ for the lower critical volume V_{el} of the ellipsoid economic shell 90
1.3. Calculating variable values $X1_{el}$ given considerable decreases in values of all variables for the lower critical volume V_{el} 95
1.4. Calculating variable values $X1_{el}$ given considerable increases in values of all variables for the lower critical volume V_{el} 97
1.5. Calculating theoretically attainable unit volume $X1_{etl1}$ given decreases number of the variable values 98
1.6. Calculating theoretically attainable unit volume $X1_{etl1}$ given increases number of the variable values 100
CONCLUSIONS 102

CHAPTER 2
CALCULATING VARIABLE VALUES X2*el* FOR THE LOWER CRITICAL VOLUME *Vel* OF THE ELLIPSOID ECONOMIC SHELL..... 103

2.1. Calculating variable values $X2_{el}$ for the lower critical volume V_{el} of the ellipsoid economic shell 103
2.2. Summary tables of the variable values $X2_{el}$ for the lower critical volume V_{el} of the ellipsoid economic shell 187
2.3. Calculating variable values $X2_{el}$ given considerable decreases in values of all variables for the lower critical volume V_{el} 192
2.4. Calculating variable values $X2_{el}$ given considerable increases in values of all variables for the lower critical volume V_{el} 194
2.5. Calculating theoretically attainable unit volume $X2_{etl1}$ given decreases number of the variable values 195
2.6. Calculating theoretically attainable unit volume $X2_{etl1}$ given increases number of the variable values 197
CONCLUSIONS 198

CHAPTER 3
CALCULATING VARIABLE VALUES X3*el* FOR THE LOWER CRITICAL VOLUME *Vel* OF THE ELLIPSOID ECONOMIC SHELL..... 199

3.1. Calculating variable values $X3_{el}$ for the lower critical volume V_{el} of the ellipsoid economic shell 199
3.2. Summary tables of the variable values $X3_{el}$ for the lower critical volume V_{el} of the ellipsoid economic shell 283
3.3. Calculating variable values $X3_{el}$ given considerable decreases in values of all variables for the lower critical volume V_{el} 288
3.4. Calculating variable values $X3_{el}$ given considerable increases in values of all variables for the lower critical volume V_{el} 290
3.5. Calculating theoretically attainable unit volume $X3_{etl1}$ given decreases number of the variable values 291
3.6. Calculating theoretically attainable unit volume $X3_{etl1}$ given increases number of the variable values 293
CONCLUSIONS 294

CHAPTER 4
CALCULATING VARIABLE VALUES *X4el* FOR THE LOWER CRITICAL VOLUME *Vel* OF THE ELLIPSOID ECONOMIC SHELL 295
4.1. Calculating variable values $X4_{el}$ for the lower critical volume V_{el} of the ellipsoid economic shell 295
4.2. Summary tables of the variable values $X4_{el}$ for the lower critical volume V_{el} of the ellipsoid economic shell 378
4.3. Calculating variable values $X4_{el}$ given considerable decreases in values of all variables for the lower critical volume V_{el} 383
4.4. Calculating variable values $X4_{el}$ given considerable increases in values of all variables for the lower critical volume V_{el} 385
4.5. Calculating theoretically attainable unit volume $X4_{etl1}$ given decreases number of the variable values 386
4.6. Calculating theoretically attainable unit volume $X4_{etl1}$ given increases number of the variable values 388
CONCLUSIONS 390

CHAPTER 5
CALCULATING VARIABLE VALUES *X5el* FOR THE LOWER CRITICAL VOLUME *Vel* OF THE ELLIPSOID ECONOMIC SHELL 391
5.1. Calculating variable values $X5_{el}$ for the lower critical volume V_{el} of the ellipsoid economic shell 391
5.2. Summary tables of the variable values $X5_{el}$ for the lower critical volume V_{el} of the ellipsoid economic shell 473
5.3. Calculating variable values $X5_{el}$ given considerable decreases in values of all variables for the lower critical volume V_{el} 479
5.4. Calculating variable values $X4_{el}$ given considerable increases in values of all variables for the lower critical volume V_{el} 480
5.5. Calculating theoretically attainable unit volume $X5_{etl1}$ given decreases number of the variable values 481
5.6. Calculating theoretically attainable unit volume $X5_{etl1}$ given increases number of the variable values 483
CONCLUSIONS 485

'For me a word of wisdom is more valuable than any gold.'

Democritus

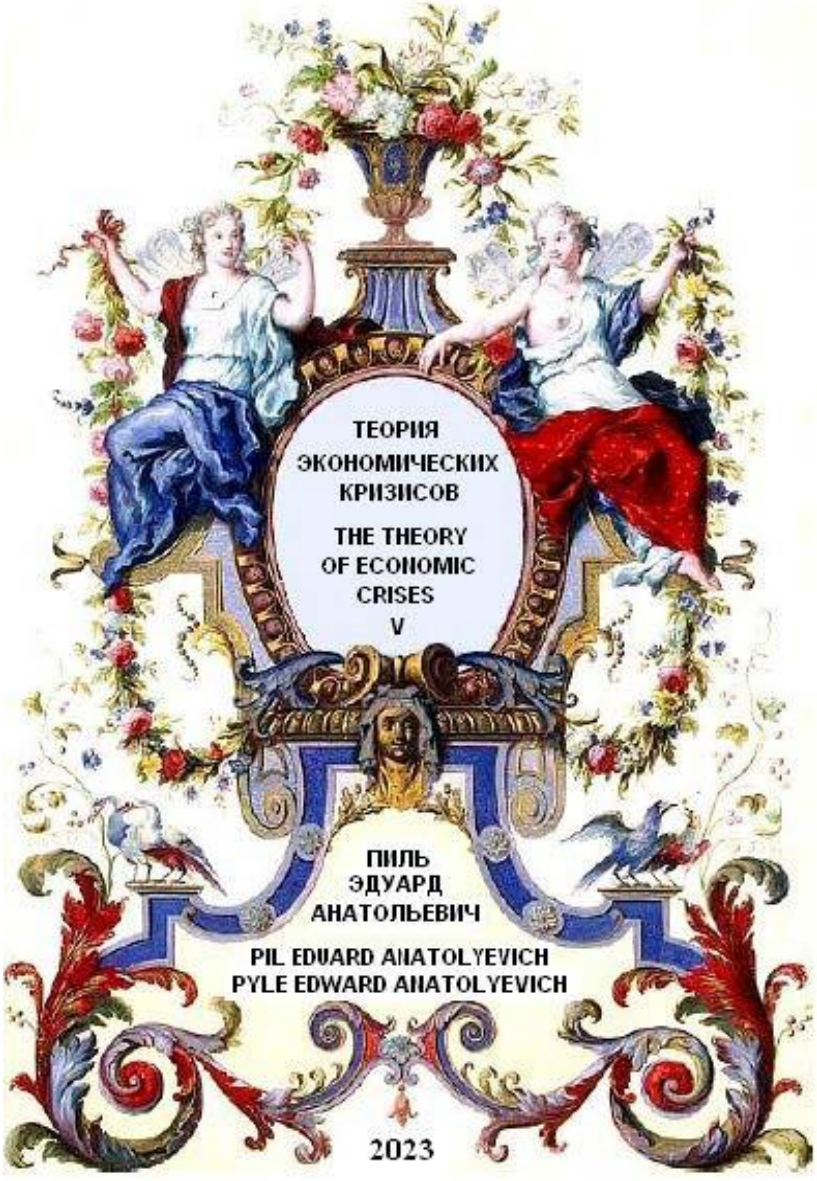

INTRODUCTION

The issue of economic and financial crises has been attended in a wide range of studies offering various solutions, none, however, allowing for a complex approach. Thus, the present study offers to apply the theory of shells to determine and describe the processes in crisis economy. The theory, so applied, allows for predicting theoretically possible scenarios, performing calculations and, based on these, developing ways to resolve crisis conditions in an economy. Governments may use the instruments offered and select a most suitable and effective solution either maintaining the current level or even increasing the country's GDP.

The book is dedicated to my son *Mikhail* and grandson *Stepan*, and to my late beloved parents and elder brother.

Wishing you all the best.

Yours sincerely, Author
