ТЕОРИЯ ЭКОНОМИЧЕСКИХ КРИЗИСОВ THEORY OF THE ECONOMIC CRISES

**Санкт-Петербург
2013**

'For me a word of wisdom is more valuable than any gold.'

Democritus

INTRODUCTION

The calculation and prediction of GDP, the primary indicator of an economy, as well as the estimation of population size, both for individual countries and the world as a whole, are the subject of numerous monographs and articles. Consequently, many people constantly face the question of what direction their own country's economy, and the global economy in particular, will take in the near future, and how this will affect the income of the average citizen.

Based on the analysis of statistical data variables, the author has derived polynomial dependencies with sufficiently high correlation coefficients for most of them, which allows for the prediction of the considered variable values with a high degree of accuracy.

This book is dedicated to my son, *Mikhail*, and to the memory of my parents and elder brother.

CONTENTS

CHAPTER 1

ECONOMIC CRISES AND THEIR ANALYSIS

1. Classification of Economic Crises	9
1.1. Classification of Economic Crises – 1	12
By Scale of Disequilibrium in Economic Systems	12
By Regularity of Disequilibrium in the Economy	13
By Nature of Reproduction Proportion Disruptions	13
1.2. Classification of Economic Crises – 2	13
By Duration	14
By Stages	14
By Sphere of Origin	14
By Nature	15
By Scale	16
By Depth	16
By Periodicity	16
1.3. Classification of Economic Crises – 3	16
By Scale of Manifestation	16
By Crisis Issues	16
By Structure of Relations in the Socio-Economic System	17
By Immediate Causes of Occurrence	17
By Nature of Manifestation	18
By Time Factor	18
1.4. Classification (Typology) of Crises – 4	18
Crisis Dynamics	20
Organizational Crises	22
Crisis Factors in an Organization	24
Grouping of External and Internal Environment Factors of an Organization	25
Types, Phases and Cycles of Crisis in an Organization	25
Organizational Liabilities and Its Insolvency as the Main Causes of Crisis .	26
Crises in State Governance	28
Features of Economic Crisis at the Macroeconomic Level	28
1.5. Classification of Crises – 5	30
1.6. Typology of Crises	32
2. Analysis of Economic Crisis Theories	37
2.1. Development of Crisis Theory	37
Evolution of Classical Crisis Theory	44
Economic Crises from the Perspective of Financial Intermediation Theory	53
Crises and Economic Survival	58
2.2. Unified Theory of Cycles, Crises, Formations	62
2.3. Comparative Analysis of M. Khazin's and N. Taleb's Theories on the Origin of the Modern Financial and Economic Crisis	62

CONCLUSION

73

CHAPTER 2

CHANGING OF MACROECONOMICS UNDER INFLUENCE BY INTERNAL AND EXTERNAL POWERS

2.1. Application of Shell Theory to Describe Processes Occurring in the Economy	74
2.2. Variants of Macroeconomic Development Following the Influence of Internal and External Powers	77
CONCLUSION	107

CHAPTER 3

CALCULATION OF THE ECONOMIC SHELL'S VOLUME UNDER THE INFLUENCE OF EXTERNAL FORCES

3.1. Parameter Values P_r , t and P_V Increase and Are Constant	108
3.2. Parameter Values P_r , t and P_V Decrease and Are Constant	109
3.3. Parameter Values P_r , t and P_V Increase and Decrease	122
3.4. Parameter Values P_r , t and P_V Increase, Decrease and Are Constant	134
3.5. Summary Tables	147
3.6. Calculation of the Minimum Theoretical Unit Volume of the Economic Shell V_{1etmin}	159
CONCLUSION	167
	176

CHAPTER 4	
CALCULATION OF THE ECONOMIC SHELL'S SURFACE AREA UNDER THE INFLUENCE OF EXTERNAL FORCES	177
4.1. Parameter Values P_r , t , PV and R Increase and Are Constant	177
4.2. Parameter Values P_r , t , PV and R Decrease and Are Constant	210
4.3. Parameter Values P_r , t , PV and R Decrease and Increase	241
4.4. Parameter Values P_r , t , PV and R Decrease, Increase and Are Constant	277
4.5. Summary Tables	356
4.6. Calculation of the Minimum Theoretical Unit Surface Area of the Economic Shell S_{1etmin}	364
CONCLUSION	370
CHAPTER 5	
MATHEMATICAL MODEL OF A CORPORATION	371
5.1. General Mathematical Model of a Corporation	371
5.2. Mathematical Model of an Enterprise	374
5.3. Mathematical Model of Real Estate	383
5.4. Mathematical Model of Financial Flows	385
5.5. Mathematical Model of Information Flows	393
5.6. Material, Financial and Information Flows of a Corporation	398
CONCLUSION	404
LIST OF ABBREVIATIONS	405
REFERENCES	408
APPENDIX 1. History of International Crises	415
APPENDIX 2. The Great Depression	423
APPENDIX 3. The Financial Crisis in Russia 1998–1999	434
APPENDIX 4. The Great Recession	447
