'For me a word of wisdom is more valuable than any gold.'

INTRODUCTION

As the Russian proverb says: "A person spends their health until the age of forty, and then begins to gather it up in crumbs." This book is intended for those who have decided to preserve and strengthen their health, as well as to combat harmful habits. Forest herbs and those from garden plots, berries and other gifts of nature without chemicals will help you cope with many ailments and become good assistants in forming a healthy lifestyle and in treating various diseases.

For 17 years, the author collected materials on the Internet concerning the latest achievements of modern medicine, which formed the basis of this volume of the book that you, dear reader, now hold in your hands. This book also presents recipes of traditional folk medicine, which broadens its audience.

The author merely presents the material copied from the Internet, suggesting that the reader draw their own conclusions, as sometimes certain articles contradict each other—for example, regarding the benefits and harms of chicken eggs.

At the same time, the author particularly emphasizes that if you have serious health problems, you should not turn to charlatans whose advertisements are splashed across newspapers and the Internet. You should consult specialist doctors. And let the recipes presented in this book become a worthy addition to the treatment prescribed for you.

I wish you all robust health and many years.

This book is dedicated to my son *Mikhail* and my grandson *Stepan*, as well as to the blessed memory of my parents and my elder brother.

Wishing you all the best.

Yours sincerely, Author
